

Curaphen *by Euromedica*

Safe and Effective Professional Pain Formula,
contains Curcumin and Turmeric

Decreases Pain, Inflammation, Muscle Tightness and Stiffness, boosts Mood

Pharmacological & Clinical Therapeutic Properties of Turmeric:

- Analgesic (pain reliever)
- Antibacterial (alleviates bacterial infections)
- Antihyperlipidemic (lowers cholesterol and triglycerides)
- Anti-inflammatory (reduces inflammation)
- Antimutagenic (anti-cancer)
- Antineoplastic (anti-cancer)
- Antiplatelet (alleviates blood coagulation / stasis)
- Antiviral (alleviates viral infections)
- Cholagogic (stimulates bile and protects gallbladder)
- Hepatoprotective (protects the liver)

Euromedica's Curaphen has been formulated utilizing the most up-to-date evidence-based ingredients for maximum benefit and potency. It contains:

- BCM-95[®] Curcumin, a patented curcumin extract that is combined with turmeric essential oils making it up to 10x more absorbable than standard curcumin extracts.
- BosPure[®] Boswellia (*Boswellia serrata* - frankincense) is another patented herbal extract that has been added to increase the pain relief and anti-inflammatory effects.
- DLPA (DL-phenylalanine) is an amino acid that helps to alleviate muscle pain by enhancing the effects of enkephalins, a type of endorphin, which are produced during acupuncture. DLPA also helps to boost one's mood by elevating brain neurotransmitters such as dopamine, epinephrine, and norepinephrine.
- Nattokinase is an enzyme extracted from a traditional Japanese soy food called natto. Nattokinase increases blood circulation to the smaller blood vessels throughout the body to increase the therapeutic effects of the other three ingredients. It helps to increase blood circulation, reduce pain and inflammation, and alleviate muscle pain, strain, and stiffness.

Directions:

Adults take 1 capsule up to 3 times daily, or as directed by your healthcare practitioner. Safe to take on an empty stomach. Take with food if there is mild stomach discomfort.

(over)

Warning:

Consult your healthcare provider if you are pregnant or breastfeeding or taking blood thinning medications. Does not contain Vitamin-K or interfere with stomach, kidney or liver function.

Free of:

Wheat, Dairy/ Milk, Gluten, Soy, Yeast, Sugar, Preservatives, Salt, Corn, Artificial Colors/Flavors

60 caps: \$38.95

120 caps: \$60.95

Turmeric root (*Curcuma longae rhizoma*) is a highly regarded herb within East Asian medicine and has been used medicinally for over 3,000 years. It has traditionally been used within Chinese medicine to “break up” blood stasis and increase blood circulation, increase *Qi* / vital energy and oxygen circulation, and alleviate pain.

Modern research examining the medicinal benefits of turmeric has revealed several key pharmacologically active compounds contained within. Curcumin is one of its most bioactive molecules and belongs to a class of compounds known as curcuminoids. Because it has the most therapeutic benefits, most turmeric herbal supplements available are standardized to a minimum percentage of curcuminoids contained within the herbal extract.

Fun Fact:

A typical turmeric root available from the grocery store or farmer’s market contains only around 2-5% curcumin, making it less effective than a standardized clinical dose optimized for maximum pain and inflammation relief. Once an individual is out of pain, they may enjoy cooking with raw turmeric root to get its broad spectrum and synergistic effects gradually over time in a whole-food form as part of a balanced and healthy diet.
